MADE BY THE OPERATOR,
FOR THE OPERATOR

Meet your next playback workflow.

Ten years in development. Shaped by over 20 years behind the controls.

01 A bigger canvas.

Frame-synchronised walls up to 15,360 × 2,160 across compatible outputs.

02 A backup that follows.

Automatic show and media sync, with playback follow. You control takeover.

03 Video out of the deck.

Extract embedded videos from PowerPoint (.pptx) and Keynote (.key).

04 Audio in balance.

Normalise your cue stack audio with one action. New or replaced cues follow the saved target.

05 Native Stream Deck.

Buttons, plus Stream Deck + dials and touch strip for fast, hands-on control.

06 Companion plugin.

Transport, cue actions, variables and feedback alongside your show controls. Beta.

07 NDI + OMT video.

Video over your network; audio via your Mac audio device. Compatible SDKs required.

08 Confidence + countdown.

Video with a large countdown, or a confidence view: current clip, timer, next cue and clock.

TRY 14 DAYS OF PRO

1. Download RollVT at **rollvt.app**
2. Open **RollVT > Licence…** and verify your trial email.
3. Build a cue stack and rehearse with your own media.

macOS 14+ · Apple Silicon and Intel. Features shown require Pro, included in the trial. Output size, frame rate and sync depend on hardware and configuration. Audience output routing remains operator-controlled.
